Twist!

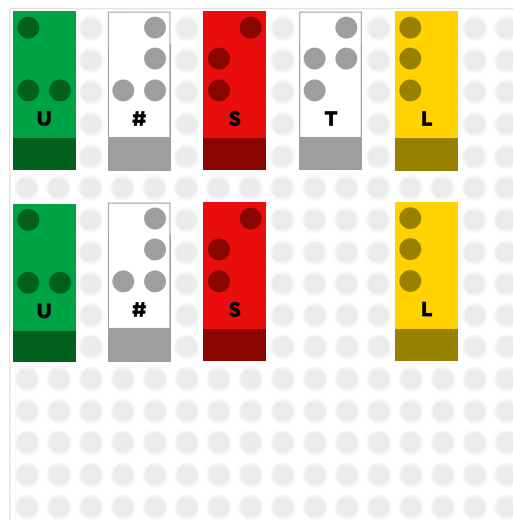

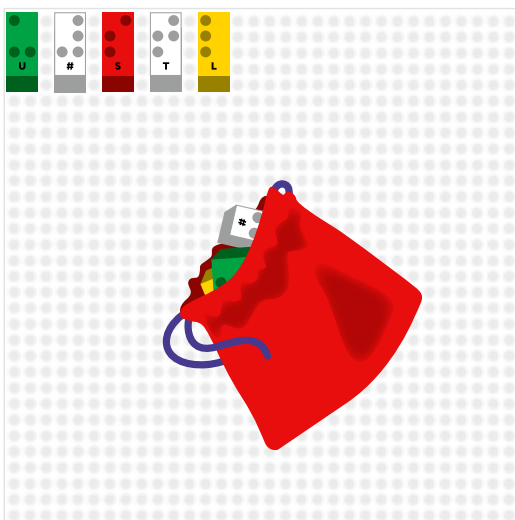

The friends are lost. Help them find each other

Identical bricks are separated. Count their studs, recognise their pattern and reunite the lost twins.

Goals

To develop tactile exploration.

To develop term-to-term matching skills.

The adult prepares

- 1 baseplate
- 5 pairs of bricks like S,E T, U, #
- 1 small bag

Separate the 5 twin sets of bricks into 2 groups.

Line one set of bricks up along the top edge of the baseplate, starting top left. Leave space after each brick.

Hide the other set of bricks in the bag.

The children play

The child feels one brick on the baseplate and find the twin brick in the bag.

They place the brick under its twin friend on the baseplate.

Facilitation tips

- Encourage exploration of the bricks and counting the studs.
- Increase the number of bricks.
- Add non-matching bricks to the bag.
- Peer play: take turns using the same bag and baseplate.
