The Missing Letter
Talking Letters

Challenge your friend to find the letter you say aloud!

By playing with the sounds of the letters, children practise sound-letter association.

Goals

To read the sounds letters make aloud.
To match identical letters.

The adult prepares

- 1 baseplate
- 2 identical sets of 5 letters each
- 1 bowl

One set is in the bowl and the other is lined up horizontally on the baseplate.

The children play

- 1 **Player 1** picks a letter from the bowl and says the sound it makes aloud.

- 2 **Player 2** finds the same letter on the baseplate and places the two identical bricks together.

Facilitation tips

- Place letters in lines, in columns or randomly. It can be more difficult to find bricks arranged in a column, rather than in a line: different tactile skills are needed.
- Put one or more extra brick(s) in the bowl so the child has to ignore some bricks.
